3 year Performance by Net Asset

Empty Page to seperate datasets. The information is the same BUT!

The main difference is that I increased (melt) the number of observations based on period columns (period 1, period 2, period 3), so each period is a seperate observation.

Performance ● Decline ● Growth ● Steady

A donut chart with three segments: a large teal segment (Decline), a large dark grey segment (Improvement), and a small red segment (No change). The teal segment is labeled 'Decline' and the dark grey segment is labeled 'Improvement'.

Response	Percentage
Decline	45%
No change	10%
Improvement	45%

A donut chart illustrating the distribution of the number of companies in the sample based on their employee count. The chart is divided into five segments, each representing a different employee range. The largest segment, colored teal, represents companies with fewer than 5 million employees (<5m). Moving clockwise, the next segment is dark grey, representing companies with more than 5 million employees (>5m). This is followed by a red segment for companies with more than 10 million employees (>10m), a yellow segment for companies with more than 15 million employees (>15m), and finally a small light blue segment for companies with more than 20 million employees (>20m).

Employee Count Range	Approximate Percentage of Sample
<5m	65%
>5m	20%
>10m	8%
>15m	4%
>20m	3%
